

Micro Monochrome Camera

The Micro Seacam® Camera with optional integral LED light ring, has been designed for work in harsh environments, such as narrow bore pipeline inspections and general underwater and in-air viewing.

The stainless steel housing can be easily decontaminated and, if required, both the focus and lens can be changed to give optimum viewing.

- Stainless Steel, Aluminium or Acetyl Housing
- Fused Silica Front Port
- 4 Pin Subcon Connector (or User Defined)
- 480+ TV lines resolution
- Wide angle electronic iris lens
- 12-24v D.C. \pm 10% operation
- 30mm dia x 120mm long exc connector
- Depth Rated 200m standard (Available up to 3000m)

"When supplied as B2B EEE the producer invokes regulation 9.2 and passes all WEEE obligations to the end user"
